**Protect your entire home from leaks with KOHLER H2Wise.**  
It's easy to take water for granted when you have it at your fingertips every day. Exactly how much water you're using is often overlooked until you have a problem. KOHLER H2Wise and H2Wise+ are smart water-monitoring systems designed to alert you so you can act and prevent problems from occurring, protecting your home and your budget.

KOHLER H2Wise connects to the water lines directly under any sink for easy DIY installation. It identifies, monitors, and interprets the water pressure in your home using ultrasonic sensors. It connects to your home Wi-Fi and allows you to pair it with your phone or smart device using the KOHLER Konnect® app, so you can monitor and track your water usage from anywhere.

KOHLER H2Wise+ installs directly to your main water line and also connects with the KOHLER Konnect app. This allows you to monitor your home water usage remotely and shut off water to your home from anywhere. Together KOHLER H2Wise+ and the KOHLER Konnect app work to protect your home from water damage when you're away or at home, saving you from potential cleanup and repair costs.

### Features

- Innovative sensor monitors water usage of all water lines in your home, 24/7. Usage is displayed via the KOHLER Konnect app on your smart phone—great for finding ways to conserve water.
- High-definition pressure and temperature sensors study water usage and measure changes 240 times per second, quickly detecting leaks.
- KOHLER Konnect app sends real-time alerts to your phone if system detects changes in water pressure signaling potential water leakage or other plumbing problems.
- Internal valve can be set up to close automatically, remotely via KOHLER Konnect app, or manually.\*
- Helps you protect your home from water damage by alerting you to leaks and automatically shutting off your water or allowing you to remotely shut it off through the KOHLER Konnect app.\*
- Ultrasonic flow meter has no moving parts which increases the lifespan and accuracy and reduces risk of particles interfering with operation.\*
- Plumbing check feature runs diagnosis of entire home's plumbing and within minutes homeowners can detect hidden flaws like poor seals and pinhole leaks.
- Prefreeze warnings help prevent frozen pipes.
